

Havering Salt Store Depot & Workshop

Romford, RM1

This project is a current scheme and features the construction of a new build salt store depot comprising a Vehicle Maintenance Workshop, Covered Store and Office mess. The Works also include Major Civils Infrastructure to the raised PCC storage bank, salt storage bins and extensive and soft landscaping.

A sewer diversion is also required and the works are being carried out immediately adjacent to a river. Environmental Protection measures are therefore of paramount importance on this project.

- Metal Deck Roofs with green roof coverings

- Fair faced blockwork internally with cedar cladding externally.

- Extensive external works comprising cut & fill, hard standings and drainage provisions.

The building services design incorporates Ground Source Heat Pump system as part of the onsite Renewable Energy provision.

Building construction entails;

- Piled Foundations

- Steel Frame
