

Mount Carmel R.C. Technology School for Girls

New Technology Block - Islington

Rooff have completed the new build construction of the technology block at Mount Carmel School for Girls in Islington.

The new building provides teaching and learning accommodation together with mobility access externally and internally.

A building of contemporary materials was designed by Gollifer Langston Architects and sits sensitively next to the original Victorian School.

Specific site constraints related to access through student playground areas, for the workforce, material deliveries and crange solutions.

Rooff's successful completion of the project, on time and to budget, followed close co-operation with the project design team: Gollifer Langston Architects, Hadi Associates Engineers, Measur (QS) and Techniker (M & E) Consultants.

Form of Contract: JCT 98
Contract Period: 40 weeks
