

St. Francis Hospice
The Hall, Havering-Atte-Bower, Essex
Health Project Case Study

Extension within an existing Hospice, to the patient and administration block for St. Francis Hospice.

Working very closely with the client in order to create the minimum of disturbance to the day to day running, we successfully constructed new entrances and extension facilities.

The clients' testimonial is in recognition of the team effort applied to the project & reflects Rooff's ability to work around the site specific constraints and issues.
