

# Latymer Upper School

Hammersmith London W6

A performing arts centre of extremely high quality was constructed for this prestigious school in West London. The building was constructed using a steel frame for the theatre and reinforced concrete frame for the remainder, the two halves being isolated to minimise sound transmission.

The scheme was won through competitive tender and was executed using a traditional form of contract. Success was achieved through an excellent working relationship amongst the entire team, and the project was completed on time and on budget.

The work was carried out on an extremely restricted site not much larger than the footprint of the building. Close liaison was maintained with the school throughout the project to minimise disruption and to ensure the health and safety of staff and pupils was not compromised.

**Client:**

Latymer Upper School

**Quantity Surveyor:**

Cook & Butler

**Architect:**

Van Heyningen & Haward

**Services Consultant:**

Max Fordham

**Structural Engineer:**

Price & Myers
