

The Siobhan Davis Dance Centre

Charlotte Sharman School London SE1

An innovative and contemporary designed Dance Centre, which fits into the existing fabric of an existing school.

The prime objective of the client was to re-furbish and extend the Charlotte Sharman School Annexe to form a new three storey purpose build Dance Studio with associated offices and changing areas.

The works included removal of the complete existing roof to provide new intermediate floors and a new GRP roof.

The Dance Studio areas will be used for performances.

Acoustic wall linings were applied to the second floor dance studio and specialist sprung floors for the dance areas.

Form of Contract: JCT98 with Contractors Design
Contract Period: 52 weeks

This was a very innovative and exciting project and we worked very hard with the project team to get the job off the ground.

The Acoustic Consultant was Paul Gillieron of Paul Gillieron Acoustic Design.

The project required sensitive management of the existing school environment, coupled with the brief to produce a high quality training and performing centre.
